

Answer the questions (8 - 11) according to the passage given below.

Lots of people love watching television. TV is sometimes funny and exciting but sometimes it is a waste of time. It has many disadvantages. Children can become overweight when they watch more than 4 hours a day. Because they never move and also they usually have snacks. Kids can show aggressive behaviours when they view violent acts on TV. Because they watch violence and they want to do what they see on the screen. Characters on TV have an effect on children so parents should be careful about the programs. Many children can wear eye-glasses because they sit nearer to the TV and look at the screen. The volume of the TV is another problem. If the sound is too loud, they can have ear problems so all the parents should limit the time of their children watching TV.

- C) be energetic.
- D) get weight.

Answer the questions (6 - 7) according to the given passage.

A greenhouse is a house made of glass. It has glass walls and a glass roof. People grow tomatoes, flowers and other plants in them. A greenhouse stays warm inside, even during winter sunlight shines in and warms the plants and warms the plants and air inside. Earth's atmosphere does the same thing as the greenhouse. Gases in the atmosphere such as carbon dioxide do what the roof of a greenhouse does. During the day, the Sun shines through the atmosphere. Earth's surface warms up in the sunlight. At night; Earth's surface cools. The greenhouse gases trap some of the heat in the atmosphere.

6. Which one is a greenhouse?
